

Press Release: Trinity Yachts delivers the 161 ft. (49m) aluminum tri-deck – M/Y IMAGINE

22 January, 2007 07:00:00

After successfully completing her sea trials, the stylish IMAGINE with her gleaming white hull and superstructure left for Fort Lauderdale and then on to the Bahamas. After a short shake down cruise, IMAGINE will then proceed onto the Caribbean for some private sailing with the new owners.

Designed and built by Trinity Yachts, the exterior styling includes the distinctive sloped pilothouse windows, hidden anchor pocket, copious exterior deck space and a design emphasizing the wishes of the owners for a yacht that truly incorporates their ideas of style, elegance and performance. Vertical oval windows on the port and starboard sides allow light into the interior while providing a change of design texture to the smooth continuous horizontal lines.

This 161 ft. x 28 ft. (49m x 8.5m) motoryacht is powered by two (2) Caterpillar 3516 B (Series II-HD) rated marine engines at 3,384hp each at 1800 rpm and encased in a heavily insulated engine room. The yacht will be capable of a maximum speed of over 24 knots at trial load and a cruise of 22 knots. IMAGINE will carry approximately 16,700 gallons (63,215L) of fuel and has a fresh water capacity of approximately 2,700 gallons (10,220). The two water makers will generate 2,400 gpd. (15,898 lpd.) each. For stabilization and especially to ensure comfort in an exposed anchorage, she has been fitted with two (2) active fin system with Zero Speed by Quantum.

IMAGINE can accommodate an Owner's party of ten (10) in five spaciouly planned staterooms in mahogany with en suite baths exquisitely finished with inlaid marble. The interior decorator was Sylvie Charest with great support from the owner's wife throughout the entire project.

Each of the four guest staterooms are located below the main deck. There are two with king size berths, two with twin berths.

The full beam Owners' suite, accessible through the owners private office, is located forward on the main deck and is complete with walk-in his/her closets. There is an elegant sitting area and luxurious ensuite master bathroom that includes a whirlpool tub, his and her vanity with etched glass recessed within a marble counter and a large book-matched marble shower as well as heated inlaid marble floors with deep rich earth tones. Within the master bathroom there is a wall of colorful stained glass using an "Art Nouveau
